Based on the compiled data from all camera traps (RECONEYX No.1-3), there are five (5) wildlife species detected throughout the year 2016 namely, Sambar deer (*Rusa unicolor*), Bearded pig (*Sus barbatus*), Pig-tailed macaque (*Macaca nemestrina*), Malayan sun bear (*Helarctos malayanus*) and Water Monitor (*Varanus salvator*).

One species which is listed in the Schedule 1 of Wildlife Conservation Enactment 1997and has been detected in Trusan Sugut Forest Reserves is the Malayan sun bear. Two species namely, Pig-tailed macaque and Water monitor which are listed in Schedule 2 were also detected. Both, Sambar deer and Bearded pig which are listed in Schedule 3 were also detected. While, based on the IUCN red list, one species namely Water monitor is classified as least concern and the other four species are classified as vulnerable.

The analysed data from all camera traps indicate that the Sambar beer species is the highest recorded wildlife with 63.5% (approximately 275 individuals) detection. This species also has been noted as the highest amount of night time appearance at 264 and frequencies of 190. While, the Bearded pig species is the second highest recorded wildlife at 35.3% on approximately 153 individuals were detected. This species has been recorded as the highest amount of daytime appearance of 129.

Based on the analysed survey data by car, the highest percentages of wildlife sighted are the Bearded Pig and Leopard Cat where both have recorded the same number of percentages and total individual sighted at 12.7% and 25 individuals. Based on IUCN Red List, the endangered species that has been detected is the Otter-Civet. Clouded Leopard which is listed under Schedule 1 of SWCE 1997 has been detected as much as three individuals.

Section 3.0 shows the analysed wildlife monitoring data particularly along the river or sea area. The highest percentages of wildlife sighted are Long-tailed Macaque as much as 51.2% (106 individuals). Based on IUCN Red List, endangered species that have been detected is Proboscis Monkey with a total at 11 individuals which are also listed under Schedule 1 (Totally Protected) of SWCE 1997.

The Orang-utan (*Pongo pygmaeus*) population density in TSFR SCA SFM Project area is estimated at 2.08 ind/km^2 (95% CI: 1.01-3.15). Based on the area of TSFR SCA SFM Project, the average Orang-utan population is estimated 79.94 individuals (95%CI: 38.82-121.09) (WWF-Malaysia, 2015).
